SECTION 02

GUIDING PRINCIPLES

Seven commitments that define how AmRRON operators train, serve, and respond.

PRINCIPLES 1–3

WELCOME, PROFICIENCY, AWARENESS

1

All patriot-minded radio operators are welcome to train, participate, and contribute for disaster response and civil defense — selflessly contributing to the preservation of life, liberty, and property.

2

Proficiency is encouraged with all forms of communications: licensed Amateur Radio, license-free radios, and any other method.

3

All citizens are sensors during a disaster. The network exists for you to stay informed and to inform others, aiding everyone's situational awareness.

PRINCIPLES 4–5

SERVICE WHERE IT IS NEEDED

4

AmRRON operators render communications assistance where it is needed and wanted — and avoid interfering where it is not.

5

Operators stand ready to support community leaders without communications capability, including clergy, elected officials, and other patriot-minded organizations.

PRINCIPLES 6–7

SELF-RELIANCE AND VALUES

6

Members should be self-reliant, ready and skilled to provide communications in nearly any environment, under austere conditions, with little or no outside support — especially when commercial power and infrastructure are down.

7

Operators are committed to traditional American values, our heritage, liberty, Christian charity, lawfulness, and helping our countrymen in times of crisis — never supporting objectives in conflict with those ideals.

HF & VHF RADIO

THE BACKBONE OF THE NETWORK

The American Redoubt Radio Operators Network
and The American Preparedness Radio Network (TAPRN)

HF RADIO

Long-haul, infrastructure-free links across states and regions — voice and digital nets when nothing else reaches.

VHF / UHF RADIO

Local and regional coordination — handhelds and mobiles keeping neighborhoods, teams, and community leaders connected.

DIGITAL COMMS SYSTEMS

DATA OVER RADIO

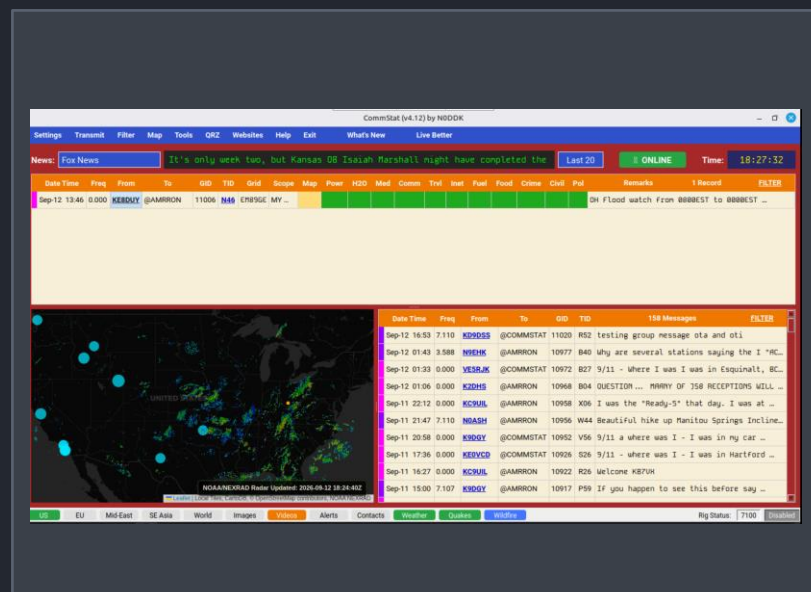

JS8CALL	Weak-signal keyboard messaging and store-and-forward relay over HF.
FLDIGI	Multi-mode digital suite for text, forms, and formal traffic.
VARA	High-throughput HF and FM data for files, forms, and email.
COMMSTAT	AmRRON's standardized situation-report and traffic format.
MESHCORE	Off-grid mesh messaging for local, infrastructure-free networks.

SOFTWARE IN OPERATION

JS8CALL & COMMSTAT

JS8CALL — keyboard-to-keyboard messaging and store-and-forward relay when signals are too weak for voice.

COMMSTAT — station traffic, net logs, and a live map of reporting stations in one operator view.

LIVE DEMO: TRI-MODE SYSTEM

LIVE DEMONSTRATION — ONE INTEGRATED WORKFLOW

JS8CALL

WEAK-SIGNAL HF MESSAGING

Keyboard-to-keyboard, relay and store-and-forward when paths are marginal.

COMMSTAT

STRUCTURED STATUS REPORTING

Standard AmRRON forms and regional roll-ups built from field reports.

VarIM

VARA INSTANT MESSAGING

Fast, error-corrected chat and file transfer when conditions support it.

Live demo: send a JS8Call message, file a CommStat report, then switch to VarIM.

REAL-WORLD RESPONSE

A DECADE IN THE FIELD

Over the past decade, AmRRON has responded to numerous real-world disasters, providing communications support to those in the affected areas.

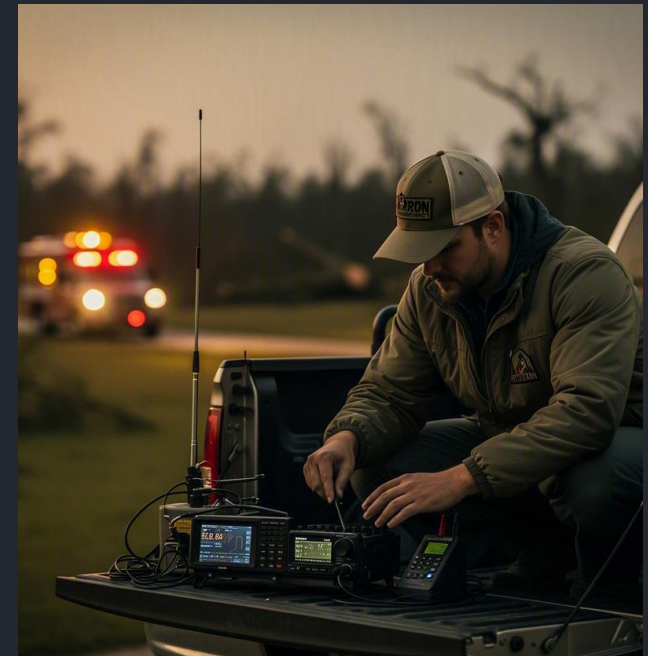

HURRICANES

WILDFIRES

OTHER INCIDENTS

When commercial power and communications infrastructure fail, the network keeps information moving.
